## **GLANTREO APPOINTS CHROMOPTIC AS DISTRIBUTOR IN FRANCE**

*Glantreo Announce HPLC/UPHPLC Columns Partner in France*

**Cork, Ireland 27 MAY 2021** – Glantreo are delighted to announce the appointment of Chromoptic as their new official distribution partner in the French market. By partnering with such an innovative company that shares the same values and growth ambitions, it further strengthens the position of Glantreo as an innovative global leader when it comes to developing material science solutions and applications.

John Hogan, Chief Commercial Officer (COO) of Glantreo said;

*“We are genuinely thrilled to be working with a company that has built such as an impressive reputation over the past number of years and firmly believe that their skills and expertise will provide Glantreo with a springboard for further expansion. We are excited that they will be distributing our innovative materials such as SOLAS™ and EIROSHELL™ columns in the French market and are looking forward to building a long-lasting relationship with the skilled team at Chromoptic.”*

Roger Patego Managing Director of Chromoptic said;

“We have been following the impressive growth of Glantreo as a company for a number of years now and our team greatly admire and appreciate the quality of materials that they produce. Their HPLC & UHPLC column offering is class-leading and allows Chromoptic to expand our offering in France and more importantly, it ensures we continue to provide innovative solutions to our customers.”

### **About Glantreo**

Glantreo develop innovative scientific solutions to solve cross-disciplinary issues and have platform technologies that initially began in chromatography that have now been applied to a range of applications.

For over ten years, Glantreo have been at the forefront of the development of next generation silicas and columns for Chromatography with fully porous and core shell media based columns for purchase and license.

Glantreo also perform a diverse range of materials science analyses and services using state of the art techniques and extensive expertise in materials testing.
