GLANTREO APPOINTS FILGEN AS DISTRIBUTOR IN JAPAN

Glantreo Announce Nanomaterials Partner in Japan

Cork, Ireland 8 JULY 2021 – Glantreo are delighted to announce the appointment of Filgen as an official distribution partner in the Japanese market. By partnering with such an innovative company that shares the same values and growth ambitions, it further strengthens the position of Glantreo as an innovative global leader when it comes to developing material science solutions and applications. Filgen was founded in 2004 and is a well-established biotechnology company based in Japan

John Hogan, Chief Commercial Officer (COO) of Glantreo said;

"We are delighted to have the opportunity to work with a company such as Filgen in the Japanese market. They have established relationships and have built an impressive reputation over the past number of years and firmly believe that their skills and expertise will provide Glantreo with a springboard for further expansion. We are excited that they will be distributing our innovative nanomaterials and HPLC columns in the Japanese market and we are looking forward to building a long-lasting relationship with the skilled team at Filgen."

Hidekatsu Yoneda, President of Filgen said;

"We are excited to be able to extend our offering to our Japanese customers through the addition of the extensive range of innovative silica nanoparticles and inorganic materials that Glantreo have developed. There is a good fit between an innovative product company such as Glantreo and a company such as Filgen who have extensive customer relationships in Japan. We look forward to creating a long-lasting relationship with Glantreo"

About Glantreo

Glantreo develop innovative scientific solutions to solve cross-disciplinary issues and have platform technologies that initially began in chromatography that have now been applied to a range of applications.

For over ten years, Glantreo have been at the forefront of the development of next generation silicas and inorganic materials for Chromatography, Drug Delivery, Diagnostics, Bio-Catalysis and other application areas.

Glantreo also perform a diverse range of materials science analyses and services using state of the art techniques and extensive expertise in materials testing

About Filgen

Filgen sell and distribute nanomaterials and research reagents, and equipment in the Japanese market and have an extensive customer base in industrial companies, National Institute, and academia all over Japan.

By introducing innovative products such as Glantreo's silica nanoparticles and inorganic materials they will contribute to the development of life science and nano science.
